

Dashboard for quick, up-to-date information on the "booking status" of all employees

Record all times via app or PC

Klaes Time Managment

Digital time recording that simply works

Klaes Time Managment makes time recording for window, door and façade companies easier than ever before.

The digital solution reliably records working hours, projects, holidays and absences - mobile, stationary and perfectly integrated into existing Klaes processes.

This allows companies to keep track of teams, capacity utilisation and projects at all times. Intuitive operation, automatic documentation and smart evaluations create transparency and noticeably reduce administrative effort.

Whether for assembly, production or office work, Klaes Time Managment provides a clear database for planning, billing and post-calculation - modern, legally compliant and efficient. The ideal solution for companies that finally want to organise working hours digitally, flexibly and in a future-proof manner.

Function overview

Mobile & stationary recording: app, terminal, PC

Easily record arrival/departure times & project times

Heat maps, team calendars & transparent evaluations

Intuitive operation for all employees

Why Klaes Time Management?

Because modern businesses need clarity

Klaes Time Management brings order, efficiency and security to daily time recording. All times are recorded digitally, accurately and in compliance with the law – in line with the current requirements of the European Court of Justice and the Federal Labour Court. This means less paper, less rework and fewer discussions. At the same time, employees benefit from clear rules, fair recording and a modern tool for holiday and absence management.

Payroll offices receive complete data at the touch of a button, and assembly and production teams work more flexibly and transparently. Integration into Klaes solutions ensures that processes remain consistent. Klaes Time Management is therefore a valuable building block for sustainable, digital work organisation.
